Cassis' work leads to traffic-flow improvements on M-59

LANSING – Perseverance has paid off for state Sen. Nancy Cassis, R-Novi, working to improve traffic flow around the White Lake Market. Work is set to begin on the project and should be completed by next month.

“I have been hearing from constituents since before I was elected to the Senate about the problems on M-59 in front of the White Lake Market,” Cassis said. “Since then, I have worked diligently and persistently to resolve this issue for them.”

Numerous meetings with residents, township officials, representatives of the Michigan Department of Transportation and Ramco-Gershenson Construction have resulted in an engineering design that would significantly reduce left turns out of the market onto M-59.

“I would like to express my appreciation to the residents, Ed Eickhoff and Ramco-Gershenson, Greg Krueger and MDOT as well as township officials who have made safety a top priority,” Cassis said. “Without everyone’s input and persistence, this project would not be possible.”

Cassis also was able to secure a \$70,000 grant for a management access study to reduce the number of curb cuts along M-59 in White Lake. This also will improve traffic safety along this heavily congested corridor.
